		Date of next review	**1st November 2027**		

Hazard - what could go wrong?	Who is at risk?	Assessment of risk	Control measures in place	Remaining risk using control measures
Falling backwards off the tyres	Participants	High	• Tyre height kept at approximately 5ft off the ground (around 1.5m). • Soft ground chosen (grass/mulch). • Clear fall zone free from obstructions on both sides. • One participant on the obstacle at a time. • Leader positioned close to assist and observe.	Medium
Impact on back/shoulders when landing	Participants	Medium	• Participants briefed on how to safely get out if losing balance. • Activity stopped if participants appear tired or unstable. • Continuously monitor ground for hard spots	Low
Rubber burn on hands or legs	Participants	Medium	• Tyres inspected for rough fibres. • Participants advised not to slide hands along tyres. • Long trousers and tops to be worn	Low
Pole failure or anchor movement	Participants	Medium	• Poles secured to healthy live trees with minimum 20cm diameter. • Knots and attachments checked by second competent adult. • Rope and ratchet tension checked before and during activity.	Low
Clothing, hair, limb entanglement	Participants	Medium	• Long hair tied back. • Scarves and loose items removed. • Risk communicated during safety briefing. • Only crawl in between tyres on the poles.	Low
Slips/trips when mounting or dismounting	Participants	Medium	• Approach and exit area cleared of debris. • Participants instructed to mount and dismount slowly. • Base Team assists at mounting point.	Low
Fatigue leading to fall	Participants	Medium	• Participants encouraged to rest or stop if tired. • Only one attempt at a time to allow recovery. • Base Leader monitors and intervenes if needed.	Low
